**Part B. CV SUMMARY (max. 3500 characters, including spaces)**

The Palaeolithic hunter-gathered societies in Western Europe has been the main focus of my research. In 1975 I obtained a University degree in Philosophy and Arts in University of Barcelona, and in 1978 I had a PhD in Prehistory with a dissertation on the lithic technology from Mediterranean Iberian Solutrean, named “La fase media del Paleolítico Superior en el Mediterráneo español”, published in Trabajos Varios 60 (SIP-Valencia). In 1975 I have been assistant professor and from 1976 to 1978 I had a three-year pre-doctoral fellowship. In October 1978 I began working at the University of Barcelona, becoming senior full professor in prehistory in 1985 at this same university, where I continue teaching now.

As a result of the archaeological outcomes in Montsant valley I created and led a research unit, namely SERP (Seminari d’Estudis i Recerques Prehistòriques), that promotes advanced research in Palaeolithic archaeology. Our entire team develops several archaeological projects in the NE of the Iberian Peninsula, the excavation of two main Upper Palaeolithic sites, Parco cave (since 1987) and Montlleó (since 2000); we were involved in international projects, such as the archaeological works in Baja California (1989-1992) and Foz Cõa (1999-2001). Our interdisciplinary team trains the future generation of archaeologists by offering educational programmes, fieldworks and laboratory analysis, combining different fields of science and humanities.

Our team has been actively involved in University teaching, and we have experience in student training with 22 PhD and 38 student research projects (Degree project), focused in social characteristics of hunter-gatherers and their subsistence economy. Since 1987 I have been the IP of 11 three-year competitive R&D projects from the Spanish Government and since 1993 the IP of the “Grupo de Investigación de Calidad del SERP” from the Catalan Government (Generalitat de Catalunya). As a member of academic staff, I have been involved in university governing bodies, such as university board, university advisory board, research and economic commissions.

Other topics of my interest are the historiography and to use archaeology and the knowledge of prehistory to benefit the general public (exhibitions, teaching materials or popular science books). I participate in teaching and research evaluation programmes from Spanish bodies (ANECA, ANEP, AQU, AGAUR, AVAP) and other international agencies (France, Belgium, Portugal and EU). Vice-president of the UISPP (the Upper Paleolithic commission). Since 2012 manager of the International University of Menorca (UIMIR).

I am the author and editor of 34 books, author of 155 papers, 95 proceedings papers, 142 non-peer review papers and 133 conferences.
