## Part B. CV SUMMARY (max. 3500 characters, including spaces)

I obtained the degree in Science (Chemistry) by the Universidad Autónoma de Barcelona in 1989. My scientific career has involved post-doctoral stays in Swiss Federal Institute of Technology in Zurich (ETH, Prof. W. F. Van Gunsteren, 1992), University of Pisa (Prof. J. Tomasi, 1995) and University of Nancy (Prof. J. L. Rivail, M. F. Ruiz-López), where I was invited professor in 1999. In 1991 I was appointed Associate Professor at the University of Barcelona (UB), being currently Full Professor since 2003. Recently, I was invited professor at the University of Parma (2017). I am leading the Computational Biology and Drug Design research team at the UB, a group recognized and financed by the Generalidad de Catalunya. I am also member of the Institute of Biomedicine (IBUB) and Institute of Theoretical and Computational Chemistry (IQTQUB), both pertaining to the UB.

My research is focused on the study of biomolecular systems with the aim to establish the relation between structure, dynamics and function, understand the molecular determinants involved in the recognition between biomolecules, and apply this knowledge in the design of new bioactive compounds (drugs). His research involve from molecular interactions in molecular systems of small size until the dynamic analysis of biomolecules. However, in his trajectory he has maintained his interest in the development of bioactive molecules for the treatment of neurodegenerative disease (Alzheimer), and more recently he has expended his interest to the study of targets related to infectious disease such as tuberculosis, influenza and malaria.

I have published near of 380 papers in international journals in the fields of Multidisciplinary Chemistry, Medicinal Chemistry, Physical Chemistry, Computational Chemistry and Biochemistry, with almost 15,000 citations and an index H of 68 (WOS). Moreover, I am co-author of 30 book chapters and I have co-edited one book. I am also co-inventor of 6 patents. I have (co-)supervised 25 doctoral theses along my career. I am member of the editorial board of *Theoretical Chemistry Accounts*, *Journal of Computer-Aided Molecular Design* and *Molecules*. I have been guest editor of two special issues for *Biochimica et Biophysica Acta: Protein and Proteomics*, and *Antioxidants and Redox Signalling*.

My scientific trajectory has been supported by several awards including the “Premio anual del Colegio de Químicos de Catalunya a jóvenes investigadores” (1995), “Premio Promoción de la Investigación para Jóvenes Científicos de la Generalidad de Cataluña” (2002-2006), and more recently the ICREA Academia award by ICREA foundation (2013-2017). Likewise, I has been distinguished with the award Luis Federico Leloir award granted by the Ministerio de Investigación de la República Argentina (2015), Antoni Caparros award granted by Fundació Bosch i Gimpera and the Consell Social from the University of Barcelona (2017), and Bruker/Manuel Rico award by the Sociedad Española de Biofísica in 2018.
