Part B. CV SUMMARY (max. 3500 characters, including spaces)

I have a degree in Chemistry from the University of Valencia (Spain) and PhD of Science from the University of Murcia (Spain). I made a post-doctoral stay at the University of Bath (UK) as invited investigator conducting research on halophilic proteins. Professor of Biochemistry and Molecular Biology since 2002. I works as a teacher and researcher at the Department of Agrochemistry & Biochemistry of the University of Alicante (Spain), which I has managed since 2009-2017 as Head of Department. I am the director of the research group "Biotechnology of Extremophiles" of the UA (VIGROB-016). I belongs to the National Extremophile Microorganisms Network since its creation in 1994. My main lines of research are: halophilic proteins (production, characterization, 3D structure and biotechnological applications), Nitrogen Metabolism in Haloarchaea (genomics, proteomics and regulation), Genome Analysis of *Haloferax mediterranei*, Transcriptional regulators and small RNAs. The research developed has been funded by the National Government and FEDER , Generalitat Valenciana, University of Alicante funds as IP. I has made R & D contracts with companies and technological institutes (BioFuelSystems, Bioarray, INESCOP, etc.). All this work has allowed me to make scientific contributions in high impact journals and specialized books. I am part of different editorial panels and a member of the Research Institute I.M.E.M. RAMON MARGALEF (IMEM) of the UA. I has been collaborating internationally with different research groups as reflected in my publications. I also act as Expert Evaluator of the EU in H2020 Biobased Industries and for others national and international agencies.
