

Part A. PERSONAL INFORMATION

First name	Amparo		
Family name	Oliver Germes		
Gender (*)	Woman	Birth date	22/01/1968
ID number	22697338H		
e-mail	oliver@uv.es	URL Web	https://webgrec.uv.es/webpages/tmp/cas/H4293.html
(ORCID) (*)			https://orcid.org/0000-0002-1207-4088

(*) Mandatory

A.1. Current position

Position	Full Professor (Quantitative Methods in Psychology)		
Initial date	23/05/2011		
Institution	University of Valencia		
Department/Center	Methodology for the Behavioral Sciences	Psychology & Speech Therapy	
Country	Spain	Teleph. number	+34963864468
Key words	110500 -Methodology / 610505-Psicometría/ 520603-Aging population/ 610800 -Psychology of Aging (see 3201.07)/ 256256 – Successful aging / 000295 – Quality of life/218694 – Multilevel in structural equation modeling/ 610599-Gender effects in Assessment in Psychology.		

A.2. Previous positions (research activity interruptions, art. 14.2.b))

Period	Position/Institution/Country/Interruption cause
1993-1994	FPU MEC/University of Valencia/Spain
1994-1999	"Prof. Ayudante"/University of Valencia/Spain
1999-2000	"Prof. Asociada"/University of Valencia/Spain
2000-2010	"Prof. Titular"/ University of Valencia/Spain

A.3. Education

PhD, Licensed, Graduate	University/Country	Year
Degree in Psychology	University of Valencia/Spain	1991
PhD in Psychology	University of Valencia/Spain	1993

Part B. CV SUMMARY (max. 5000 characters, including spaces)

Head of ARMAQoL-GIUV2017-359 (Advanced Research Methods Applied to Quality of Life Promotion), an interdisciplinary group (<https://www.uv.es/uvweb/research-service/en/research-groups/grup-1285949714098.html?p2=GIUV2017-359>). 4 six-year research terms recognized (the last one 2011-2016), 5795 citations so far, h-index=36, i10-index=94.

Our topics of research are mainly focused in contributing from methodology to several areas of quality-of-life promotion, not only older adults and successful aging. Although many efforts are in the development and testing of predictive models focused on older adults' population, based on knowledge on loneliness, depression, personality traits, social and physical activity, quality of life dimensions, ... there are also further contributions, mostly research on the area of palliative care and end of life. In this area, I have worked in the improvement, validation and measurement protocols for patients and their health-care professionals. When attending patients, focusing on constructs such as self-care, dignity, spirituality, coping with death, or demoralization, ... When working with healthcare professionals research has also been extended to many other professionals attending high emotional demands. This is the case of policemen, staff working with people with mental disabilities, or

professionals in childcare with special needs. In these topics, research efforts are methodology focused, developing and validating new measures, studying properties as gender or cultural invariance. Also developing short measures to improve the applications in applied challenging contexts. Another topic of research in which I am involved is the promotion of entrepreneurial attitudes in youth. For that, our own research protocols have been developed (EASS, Oliver & Galiana, 2015). Currently we integrate this measures in theoretical well-known models useful to monitor outcomes of interventions. These interventions are in line with quality-of-life promotion, as they are expected not only increase entrepreneurial intention, but prosocial behavior, self-efficacy, academic achievement, etc.

Similarly, the transference with research in developing measurements and interventions regarding sexism as a construct to prevent gender violence has been fruitful. The ICT have been successfully used developing patented applications as Liad@s with an excellent assessment in educative institutions and especially working with vulnerable youth.

An important part of my activity takes place in the PhD program of Promotion of Autonomy and Socio-Sanitary Attention to Dependency with the role of coordinator. Most of my recent research profile is done in collaboration with our former PhD students and/or collaborators that now become recognized researchers. This is the case of Laura Galiana, Patricia Sancho, David Rudilla, Gabriel Vidal-Blanco, Noemí Sansó,...Or some others currently PhD candidates, as Irene Fernández, Sara Martínez, ...My PhD supervised so far are 20, 17 in the last 10 years period.

Research visits and collaborations into the time period with Barry Schneider (*University of Ottawa, Canada in 2012 and later in 2018 Boston College, MA, USA*); Julian Montoro 2015 (*UNCC at Charlotte, NC, USA*), Shane Sinclair (*Calgary, CA*), Eve Ekman (*San Francisco, USA*), David Kissane (*Monash University, AU*), Michael Silberman (*Middle East Cancer Consortium, IL*), Fernanda Arena in Brasil (*CNPq*) and Argentina (*Prof. Gustavo de Simone, Pallium*). In 2018 a funded research stay at RCC Harvard with IECO-UV (*Boston, USA*) and 2019 in ESAN Business School FabLab+Incubator (*Lima, Peru*).

Intervention protocols as GES and KIBO at the end of life have been not just published but successfully transferred from 2019 as therapeutic tool in applied settings as Psychosocial Attention Teams (EAPS) from Madrid & Castilla-La Mancha or included into the training program for professionals of SERMAS (Servicio Madrileño de Salud) for 3 years. David Rudilla (former PhD in 2014) currently responsible as Patients and Quality Outcomes Research Manager, at Home Healthcare Europe Cluster of Vital Air (Air Liquide Company) is the main driver for this transference.

Research transference profile includes being member as expert of relevant citizens' committees. Developing initial draft of the Law for Dignity and Quality at the End of Life since 2018, and currently member of Consulting Committee for the Implementation of Organic Law 3/2021, as expert designated by the Valencian Government. Also, local conferences and talks about self-care & successful aging along the Valencian Community (Requena 2017, Quart de Poblet 2016) and additionally, impact actions dealing to the Award in Research Transference to the Citizens 2016 given by *Federation of Valencian Neighborhood Associations*.

C.2. Congress

Oliver, A. (2021). Participación en actividades de ocio en el adulto mayor y bienestar psicológico. Invited presentation to VIII Congreso Internacional de Investigación en Salud y Envejecimiento & VI Congreso Internacional de Investigación en Salud, 15-16 septiembre 2021, Murcia (España)

symposium: “Investigación sobre calidad de vida en envejecimiento: propuestas y efectos de género”.

Oliver, A. & Tomás, I. (2021). Gender Issues in Methodology: A discussion on its effects on research and teaching. Symposium coordination, *9th European Congress of Methodology*, Valencia 21-23 July.

Oliver, A.; Galiana, L.; Martínez-Gregorio, S.; Pallardó, F; Sansó, N.; Rudilla, D. & Herrero, R. (2020). Self-caring and end of life care competences: assessment of an interdisciplinary short course. Poster presented and awarded as TOP 3 in this research category at *11World Research Congress (online) European Association of Palliative Care, EAPC*. Palermo, Italy.

Oliver, A. (2021). Participation in an Expert Panel, round table on Multidisciplinary Research on Aging, Active, Healthy and Happy Aging Conference, Príncipe Felipe Research Center (CIPF), Valencia, October 1st. Research dissemination conference with the participation of the administration, citizen associations, research centers and stakeholders involved in promoting the quality of life of the elderly.

C.3. Research projects

H2020 European Project MESOC (870935) 2020-23. Research and Innovation Action to propose, test and validate an innovative and original approach to measure social value and impacts of culture, policies and cultural practices in 3 domains: a) Health and Well-being, 2) Urban and Territorial Renewal and 3) Commitment and Participation. Consortium of 10 members with a budget of 2.98 M € led by P. Rausell (University of Valencia) with A. Oliver in WP related to methodology and analysis.

RTI2018-093321-B-I00. C@vis-Quality of Life and Social Interaction of Older People in Spain: Proposals from a gender perspective. FEDER / MICINN, State Research Agency, 2019-21. IP A. Oliver & JM Tomás. This is the previous project to the one we are currently applying for.

Special Actions. Psychosocial & biological markers in older adults living in community: quality of life diagnoses & promotion. UV research program. 2018-9. IP A. Oliver.

PSI2014-53280-R. Longitudinal study of successful aging in learning programs through life: impact on bio-psychosocial welfare. MINECO, I+D Social Challenges 2015-17. IP A. Oliver & JM Tomás.

Valoritza 2015 I+D funding program. Research transference project regarding Gender & Quality of Life Promotion: Development and validation of Liad@s, the first free psycho-educative App to prevent dating violence in adolescents. IP JJ Navarro.

Ref: 154/12. Spatial epidemiology of gender violence and characteristics of neighborhoods: A pilot study in the city of Valencia. Institut for Gender Studies (Ministry of Equity & Social Affairs). IP Enrique Gracia, 2013-4.

C.4. Contracts, technological or transfer merits

2021, “Agreement of Research Cooperation” CIPF, Centro Investigación Príncipe Felipe (Deborah Burks) & UV (Amparo Oliver) to integrate psychosocial & biological approach under gender perspective. After being (mentor) junior team Valencian Community in 2019 at Technovation program to promote Entrepreneurship & STEM careers in Girls, our project HOSLY app was upgraded and awarded as Innovative Healthcare idea by INCLIVA in 2019-20 edition.

Software (2018) Patent number 208064 Liad@s for iOs and Android. Collaboration as consultant for ECONcult (AVI, GVA) in app AUcult (approaching culture to “prosumers”) in 2019.
