Part B. Free Summary of CV (Max. of 3.500 characters, including spaces)

The researcher is graduated (1983) and doctor (1990) in Biological Sciences (FPI scholarship). He completed a postdoctoral position (postdoctoral fellowship) at the Cleppa park Field Research Station (Cardiff University) (1990-1991) and subsequently at the Department of Animal and Cell Biology at the Free University of Brussels (ULB) (1991 -1992). In 1992 he joined as a contracted researcher at the Zaidin Experimental Station (CSIC) (1992-1994) and later obtained a position in the Zoology Area of the University of Jaén, as Prof. Assistant (1994-2000). In 2000 he obtained the position of Professor Titular. During his stage as a pre-doctoral fellow, he has researched the biology, ecology and control of various olive tree pests, as well as the control of fir scolothids (*Picea abies*) during his postdoctoral stay at the University of Brussels. During his contract at the Consejo Superior de Investigaciones Científicas (Granada) he has been responsible for the application of an integrated control program of dutch elm disease in the elm of the Alhambra and Generalife forests (Granada), which in combination with the induction of resistance has provided satisfactory results. Since joining the University of Jaén, he has been involved in the study of the biology and control of various olive tree pests, such as the moth (*Prays oleae*), the olive bark beetle (*Phloeotribus scarabaeoides*), the olive fly (*Bactrocera oleae*), the branch borer (*Euzophera pinguis*), as well as in the study of the complex of natural enemies associated with the main pests of the olive tree, the assessment of the influence of the different types of olive groves management (Conventional, IPM; and Ecological) in the beneficial insects diversity, abundance and effectiveness as control elements. In recent years (2017-2021) I have focused mainly on the application and improvement of a new practical methodology for the determination of olive groves in ecological management, as a complement to the analytical methods. Among the scientific transfer activities, it is worth highlighting the realization of a website for the identification of olive tree pests, and a total of 17 intellectual copy right records on the ecological relationships of arthropods and vertebrates in different urban, agricultural and forest ecosystems.

He has been the author / co-author of 15 national and international chapters in specialized editorials, more than 45 communications to congresses, has been the PI or has been part of the research team of 15 competitive research projects including European projects, National projects, coordinated actions, and contracts / agreements. He has conducted 2 doctoral theses and 15 master's degree dissertations. Since 2016 he has been part of the panel of experts of the European Union (ID ngonzcjede). He is evaluator of journals of international prestige and indexed in the JCR. since 2019 he is coordinator of the Doctorate Program in olive oil (University of Jaén).

C.2. Research Projects (last 5 years)

Title: SUSTAINOLIVE: Novel approaches to promote the SUSTAINability of OLIVE cultivation in the Mediterranean.

Funding entity: PRIMA-H2020.

Duration: From: 2019 to: 2023.

Main researcher: Roberto García Ruiz

Title: Avance multidisciplinar en la gestión y conocimiento de las cubiertas de restos de poda en olivar a escala árbol, parcela y explotación.

Funding entity: EC FEDEER.

Duration: From: 2021 to: 2023.

Main researcher: Antonio Rodriguez Lizana

C.3. Contracts (last 5 years)

Title del contrato: Survey of fauna of olive trees in Al Jouf region in Northern Saudi Arabia.

Participant entities: UJAEN-Universidad Al Jouf (Arabia Saudí)

Duration: from: 2015 to: 2017.

Main researcher: Ramón González Ruiz.
